

TECHNICAL SPECIFICATION SHEET

SOFTWARE-BASED FOIP SOLUTIONS FOR ORGANIZATIONS OF ALL SIZES
REQUIRING COST-EFFECTIVE OFFERINGS FOR LIGHTER FAXING VOLUMES

OPTIMIZING MIGRATION FROM TDM TO VoIP

XMediusFAX® software solutions are optimized to efficiently address the accelerating global TDM to IP migration trend, deliver enhanced productivity, streamlined operations, and lower total cost of ownership (TCO). These solutions address diverse fax deployment drivers ranging from increasingly stringent regulatory requirements, evolving infrastructure strategies (i.e., UC, ECM, 'branch' optimization), flexible application integration (ERP/CRM) to adoption of more economical, eco-friendly core technologies (i.e., FoIP, virtualization) and versatile multifunction devices (MFDs).

LEADING THE IP FAX SERVER MARKET

XMediusFAX® is a patented and robust IP fax server solution supporting the secure and standardized T.38 Fax-over-IP protocol and G.711 Fax Pass-Through. Introduced in 2002, XMediusFAX® is a global leading software-only IP fax server solution that is offered in three application optimized editions, namely, SP for Service Provider, EE for Enterprise, and X for Express.

ENSURING SECURE TRANSMISSION OF HIGHLY SENSITIVE DOCUMENTS

Retail

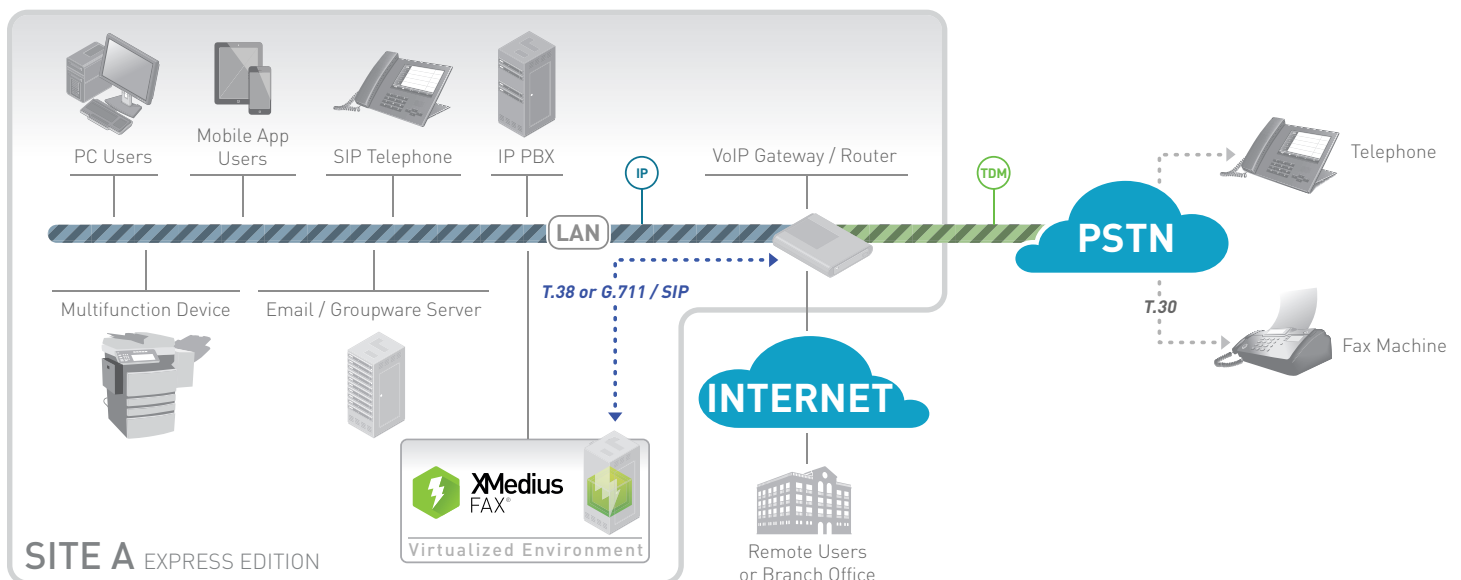

Ideal for faxing: Patient Records, Prescriptions, Contracts, Legal Documents, Reports, Transcripts, Financial Records, Invoices, Insurance Forms, etc.

EXPRESS EDITION HIGHLIGHTS

The XMediusFAX® Express edition is ideal for organizations requiring a software-only fax solution with up to 4 fax channels and email integration for a small to medium sized user group (up to 100 users). The Express edition contains a number of key features including:

- ▶ Unique Exchange integration and enhanced user productivity with Outlook add-ons
- ▶ Enhanced LDAP directory integration (i.e., Active Directory, Lotus Domino) with LDAPS support
- ▶ Automated document deliver leveraging any combination of fax routing methods
- ▶ Hardcopy paper faxing with support for multiple MFD manufacturers including Xerox, Ricoh, eCopy ShareScan, Sharp, Lexmark
- ▶ Web-based fax composition and system management
- ▶ Multilingual support for international character sets
- ▶ Easy to deploy with simplified network installation support through Windows Installer (MSI) technology
- ▶ Virtual machine support using VMware, Microsoft Hypervisor and Citrix
- ▶ Advanced SIP Trunking (T.38 and G.711) and T.38 Fax Relay with fallback to G.711 Passthrough
- ▶ Rich administration and monitoring tools
- ▶ Comprehensive inbound fax routing methods for telephony (i.e., DID, CSID) and character recognition based (i.e., OCR) solutions
- ▶ Fax deletion options for zero retention to comply with strict data security policies
- ▶ Advanced traceability through an event log tab for complete fax audit
- ▶ Mobile app optimized for iPad and iPhone

XMediusFAX® EXPRESS EDITION TYPICAL IMPLEMENTATION

COMPELLING ECONOMICS

Providing Substantial ROI

Simple to use and administer, XMediusFAX® Express yields considerable and rapid ROI, since expensive fax boards and dedicated analog lines are not required.

Increasing Staff Productivity

XMediusFAX® boosts productivity over traditional manual faxing, since users no longer need to make time-consuming trips to a fax machine.

Reducing Telecom Costs

XMediusFAX® significantly reduces telecom costs over traditional faxing. In multi-branch organizations, long-distance fax charges are drastically reduced through XMediusFAX®'s built-in Least Cost Routing. XMediusFAX® eliminates costly analog phone lines, hardware, maintenance and supplies.

Organizations can make significant cost savings each year with XMediusFAX®.

Facilitates Seamless Interoperability and Cost-Optimized Application Integration

XMediusFAX® drives business process costs down by seamlessly interoperating with VoIP gateways, IPBXs, voicemail systems (UM/UC applications including Microsoft Exchange), LDAP directories, ECM/ERP applications including Microsoft SharePoint.

ENTERPRISE GRADE SOLUTIONS

Improving Security and Compliance

XMediusFAX® advanced user/admin control, management, and encryption features efficiently protect document privacy and facilitate compliance with regulations, such as HIPAA and the Sarbanes-Oxley Act. Sensitive documents in TIFF or PDF format are routed to only approved recipients and designated secure printers/MFPs. Faxes can be tracked through an event log tab, making it easy to monitor all system events and user/administrator actions related to a single fax. Thanks to fax deletion options for zero retention, faxes can be deleted immediately after successful delivery.

Enabling Survivability

The XMediusFAX® Express edition can benefit from disaster recovery (DR) when peered with an XMediusFAX® Service Provider edition server.

Enabling a Future-Proof Investment

As a completely software-based IP fax server solution, XMediusFAX® Express edition does not require any extra hardware or third-party kits. It is a future-proof fax server solution and a perfect companion for a VoIP deployment, allowing you to convert all circuits to IP, including fax. Advanced T.38 and G.711 SIP Trunking (including T.38 Fax Relay with fallback to G.711 Passthrough) and H.323 support also ensure compatibility with today's and emerging VoIP systems.

SIMPLE OPERATIONS

Faxing Anywhere, Anytime, & from Any Device

In today's increasingly connected and mobile workplace, XMediusFAX® software solutions provide users unique operations simplicity in sending and receiving faxes from a wide spectrum of interfaces (i.e., desktop email clients, MFPs, mobile app optimized for iPad and iPhone, etc.) and leveraging powerful web-optimized reporting tools - with guaranteed performance.

Unleashing the Power of FoIP Driven Green Solutions

XMediusFAX®'s support for key core technologies including virtualization and FoIP permits organizations unprecedented flexibility to rapidly and easily deploy cost-effective and green optimized solutions.

Administration

XMediusFAX® boosts productivity up to 90% over traditional, manual faxing:

- Comprehensive integration with Microsoft Exchange
- Centralized Microsoft Management Console (MMC) or web administrative interface for easy system administration (Assistive Technology Optimized)
- Manage faxing, users and Quality of Service (QoS) on a per-site basis
- Simplified user management with enhanced LDAP directory integration
- Delegate site administrators with configurable permissions
- Network installation support through Windows Installer (MSI) technology
- Thin client support via Microsoft/Citrix Terminal Services
- Configurable time zone at user and site level

Automatic Fax Delivery

- Methods: DID, DNIS, ANI, CSID, OCR, Channel and LDAP search
- Destinations: user, email, printer, folder
- Configurable notification templates and attachment filename and automatic page split
- DTMF code support for SIP protocol (inbound/ou bound)

Monitoring & Reporting

- Monitor all faxes sent, received, or in process, as well as server status
- Live graphical fax port usage monitor and integrated network packet capturing utility
- Email notification of service status events to administrator via SMTP
- Administrative audit logging and application services status changes logged in Windows Event Log
- System queue monitoring and alerts through SNMP and Performance Monitor (PerfMon)
- Integrated system reporting with a comprehensive set of 20+ built-in reports

Supported Document Formats

- Adobe PDF, HTML, JPG, GIF, RTF
- Microsoft Word, PowerPoint, Excel
- Any Windows application that support "Print-To"

Survivability & Scalability

- Off-Site (inter-system) replication for business continuity and Disaster Recovery (must be peered with an SP edition server)
- MySQL Database scalable to millions of inbound/outbound faxes with easy archiving
- Virtualization ready for enhanced system availability and resources allocation
- Support for multiple T.38 and G.711 VoIP gateways with redundant dial-plans
- Support for branch survivability via Cisco's SRE-V solution within the Unified Computing System (UCS) Express platform

User Productivity

- Mobile iOS and Android support
- Custom forms for Microsoft Outlook and Lotus Notes allow users to select coversheets and modify fax transmission settings
- Fax notifications in HTML or text format, and attachments in TIF, PDF, or searchable PDF
- Select either individual or broadcast report notifications
- Web-based fax composition and management with integrated phone book (private and public)
- Built-in viewer in the web interface
- Drag-and-drop transmit using SendFAX
- Rearrange pages; add text insertions, highlights, and stamps to faxes
- Multilingual support & support for international character sets. Available languages include English, French, German, Spanish, Italian, Portuguese, Russian, and Chinese
- Drop multiple files to remote servers via standard Internet file transfer protocols (SFTP, FTPS/SCP/FTP)
- Delayed / Scheduled Faxing
- User Fax Box Delegation
- Fax auditing through event log
- Advanced sorting features for fax lists
- Outbound SMS Relaying Service to securely send notifications and short messages
- User account monitoring
- Print to web fax composition
- HTML5 & CSS3 web-ready interface

Faxing to remote printers

- **SMTP:** for any printer configured to receive print jobs (with either TIFF or PDF attachments) via an email address.
- **HP ePrint:** for Internet printers compatible with the HP ePrint service (receiving print jobs via their email address).
- **Xerox Mobile Print:** for Internet printers compatible with the Xerox Mobile Print service (receiving print jobs via their email address).
- **Google Cloud Print:** for Internet printers compatible with the Google Cloud Print service (either natively or using the Google Cloud Print connector).

Hardcopy Faxing (MFD)

- Platform specific - via XMedius connectors
- Xerox Extensible Interface Platform™ (EIP) 2.0/2.5/3.0
 - Ricoh ESA SDKJ 10/11/12
 - eCopy ShareScan 5.0
 - Sharp OSA 4.1
 - Fuji Xerox Apeos 5.0
 - Lexmark eSF 4.1

Via standard interfaces

- T.37 – Ricoh, EFI, Canon, Lexmark, OKI, Muratec, Okidata, Toshiba
- Scan to SMTP – Konica Minolta, Brother, Dell, Kyocera, Okidata, Olivetti, Samsung, Toshiba
- XML File Polling – Kyocera, Xerox Server Fax, HP

Integration

- XMedius connector for SharePoint 2016/2013/2010
- T.38 and G.711 SIP Trunking and T.38 Fax Relay with fallback to G.711 Passthrough

Security

- Encrypted Fax Transmission over SRTP
- SSL authentication and encryption between all server modules and clients
- HTTPS for secured Web Client communications
- Built-in Windows Authentication support
- Support for LDAP over SSL (LDAPS)
- Enforce usage of billing codes
- Restricted destination fax number tables
- Per user/profile security settings (allow to fax, require password, modify sender information, enforce cover page)
- Fax deletion option for zero retention

Supported Environments¹

VoIP Gateways

- Cisco, Avaya, AudioCodes and Alcatel VoIP Gateways

Fax Protocols

- ITU T.38, T.37, G.711 and G.711 Fallback
- V.34 Super G3
- ECM (Error Correction Mode)
- SIP UDP, TCP, TLS
- H.323, and MGCP (only CUCM)

Fax Boards

- Brooktrout TR1034 (analog and digital) and TruFax
- Dialogic Diva Server (analog and digital)

Operating Systems

- Virtual machine support (i.e., VMWare, Hyper-V, Citrix)
- Server: Windows 2012/2012 R2/2008/2008 R2 (32 or 64 bits)
- Client: Windows 8/8.1/7/10
- Cisco SRE-V / UCS Express

Email Server

- Microsoft Exchange 2016/2013/2010
- Microsoft Exchange Online
- Lotus Domino 9.0/8.5/8.0
- Any SMTP mail server

Fax Clients

- Microsoft Office 2016/2013/2010/2007 (32 or 64 bits)
- OpenOffice.org 4.0/3.4/3.2/3.1/3.0/2.4
- Outlook 2016/2013/2010
- XMediusFAX® SendFAX client for advanced fax composition
- Any SMTP mail client (i.e., Outlook Express, Eudora and Mozilla)
- Microsoft Office Internet Fax Service Integration

Web Browsers

- Microsoft Internet Explorer 9.0+
- Microsoft Edge
- Mozilla Firefox 3.6+
- Google Chrome: all latest versions
- Apple Safari 5.x+
